6035		Lot 6035: Rancilio Specialty Invicta Commercial Espresso Machine (see extended description) The Rancilio Invicta (specifically corresponding to manufacturing or part designations like MCRA3-07322) is a high-end, commercial-grade single-boiler espresso machine engineered by the Rancilio Group. It is designed for high-volume specialty cafes and coffee shops, prioritizing absolute thermal consistency, precise pre-infusion, and streamlined barista workflows., Key Specifications & Technologies, Steady Brew Thermal System: Unlike standard single-boiler designs, the Invicta utilizes a regulated heat-exchange circuit paired with insulated group heads. This keeps water temperatures highly stable and repeatable even during intense, back-to-back peak hours., T-Switch Group Control: Each brewing group features an independent 4-position T-Switch. This allows baristas to quickly toggle between set temperatures (ranging from 88°C to 99°C) to match different coffee roast profiles., Programmable Infusion Phases: To maximize extraction and prevent channeling, you can fully adjust both the pressure and duration of the low-pressure pre-infusion and final post-infusion stages., Advanced Barista Interface: Equipped with a central 4.3" master touchscreen alongside individual digital shot-timer and extraction displays on every group head. It features an "easy" mode for daily operations and a "tech" mode for deeper parameter adjustments., Smart Flush & ABM: The machine initiates an automatic group flush between shots to maintain baseline thermal conditions. Advanced Boiler Management (ABM) software prevents power or steam drops when brewing and steaming happen simultaneously.	6044		Lot 6044: Stainless Steel Work Table With Hutch 48" x 24" x 66" With Contents Gloves, Plastic Buckets, Box Of Stainless Steel Work Table With Hutch 48" x 24" x 66" With Contents Gloves, Plastic Buckets, Box Of Heavy Weight Spoons & More
